Presented by The Clearwater Garden Club
Sponsored by Wilcox Nursery & Landscape

The Goal

Between 5000 and 10000 families in the Clearwater area live in apartments, condos, or townhomes and most of them have a balcony. Only 10 percent of these families grow plants or flowers in their home.

The Clearwater Garden Club is happy to introduce Balcony and Container Gardening to the Clearwater area. We hope it will enhance your lifestyle through gardening and bring you pleasure in the form of enjoyment, happiness, and relaxation.

FOR COMMUNITY MANAGERS:

To find out more about how our presentation to your audience will make you their champion please contact us at clearwatergardenclub@gmail.com and ask about our Balcony and Container Garden Presentation. Thanks!

**Whether it is flowers,
plants, or herbs,
gardening in
containers will bring
you many benefits**

The Benefits

ENJOYMENT

Whenever you garden you feel as if you came to a beautiful and peaceful place.. You have created something special to enjoy.

HAPPINESS

The mycobacterium found in the soil increases serotonin produced in the brain (also known as the "happy" chemical). By getting your hands dirty, you're also making your brain happy!

RELAXATION

When people spend time gardening their anxiety levels drop and they feel less depressed. Working in a garden can also help you recuperate if you've experienced something stressful. Did you know that working with plants is part of many addiction recovery programs.

Our Presentation Teaches

IRRIGATION

Learn why irrigation is so important to a successful balcony garden.

YOUR ENVIRONMENT

What is unique about your environment and why you should only grow certain plants.

THE BEST LISTS

Learn what plants, flowers, and herbs are best suited for growing in containers and on your balcony.

GETTING ALONG

It is important to know what is allowed on your balcony, and to not cause anxiety with the neighbors.
